- ❑ each one of us could reduce their personal waste and recycle more
- ❑ we should put recycling bins around the school in order to recycle electronic devices or paper, glass and aluminium. The school can also raise awareness on the issue by properly informing the students and motivating them to do more to protect the environment
- ❑ plant more trees and start a campaign about the environment
- ❑ we can reduce travel by car
- ❑ we can still recycle in every house so that there is not a lot of rubbish on the streets
- ❑ in schools do some programs on the subject of the environment
- ❑ we can start to change our cars to electric ones to reduce the toxics in the air from the gas
- ❑ we should start a composting area and inform the students/teachers how it works
