

PROBLEMS & SUGGESTIONS

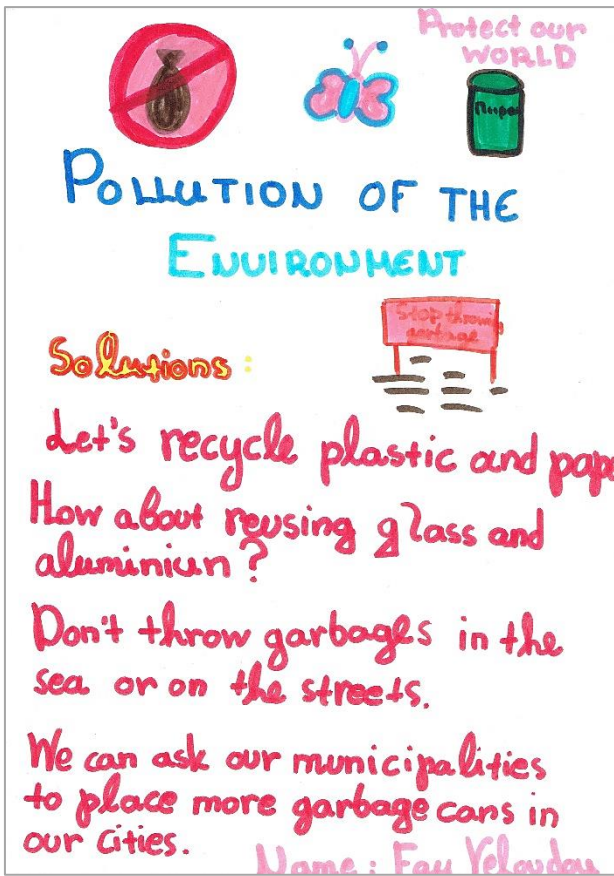

Τα προβλήματα που αντιμετωπίζουμε καθημερινά στην πόλη και οι λύσεις τους, από τις τάξεις Ε1 και Ε2.

Κομμάτι που απασχόλησε σε ένα από τα μαθήματά μας τους μαθητές και τις μαθήτριες ήταν τα σύγχρονα προβλήματα στην πόλη: τα απορρίμματα, η μόλυνση του περιβάλλοντος, τα καυσαέρια, οι δασικές πυρκαγιές, η ηχορύπανση, η έλλειψη πρασίνου, η κυκλοφοριακή συμφόρηση, τα αδέσποτα ζώα, ο κορονοϊός, κλπ.

Επέλεξαν λοιπόν να φτιάξουν αφίσες με τις προτάσεις τους στα αγγλικά, τις οποίες και παρουσιάζουν μέσω της σχολικής εφημερίδας. Τα παιδιά, έτσι, κατανόησαν με τον καλύτερο τρόπο ότι ***αποτελεί συλλογική και ατομική ευθύνη να προστατεύουμε τον κόσμο στον οποίο όλοι ζούμε.***

Protect our WORLD

POLLUTION OF THE ENVIRONMENT

Solutions:

- Let's recycle plastic and paper
- How about reusing glass and aluminium?
- Don't throw garbage in the sea or on the streets.
- We can ask our municipalities to place more garbage cans in our cities.

Name: Fou Yeloudou

PROJECT

Listening to music too loud to disturbing your neighbors

I ♥ MUSIC

My opinions and suggestions:

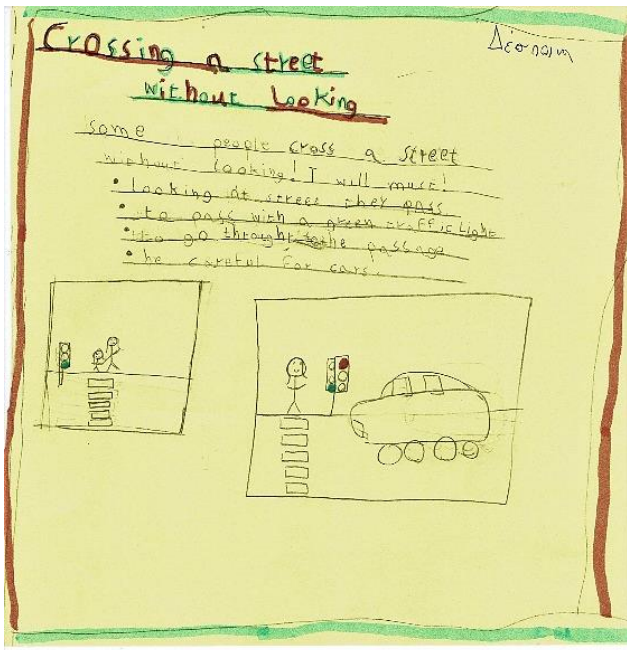

- I suggest listening to music only at fixed times, rather than during quiet hours.
- I suggest not listening to music, very loudly, to disturb your neighbors.
- I suggest listening to music with headphones and do not make too much noise in general.
- I suggest listening to music in another place, like for example in the park or get permission from your neighbors to listen to music in your house.

Crossing a street without looking

Some people cross a street without looking! I will make!

- looking at street when they pass
- to pass with a green traffic light
- to go through the passage
- be careful for cars

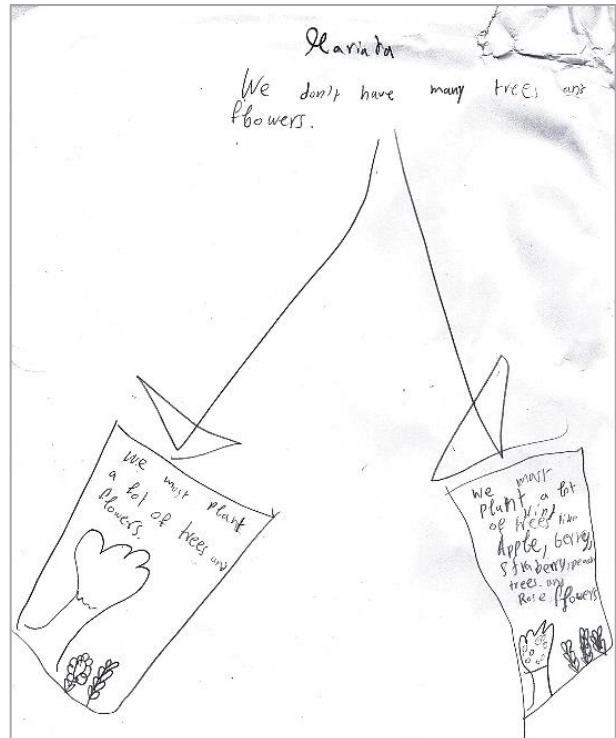

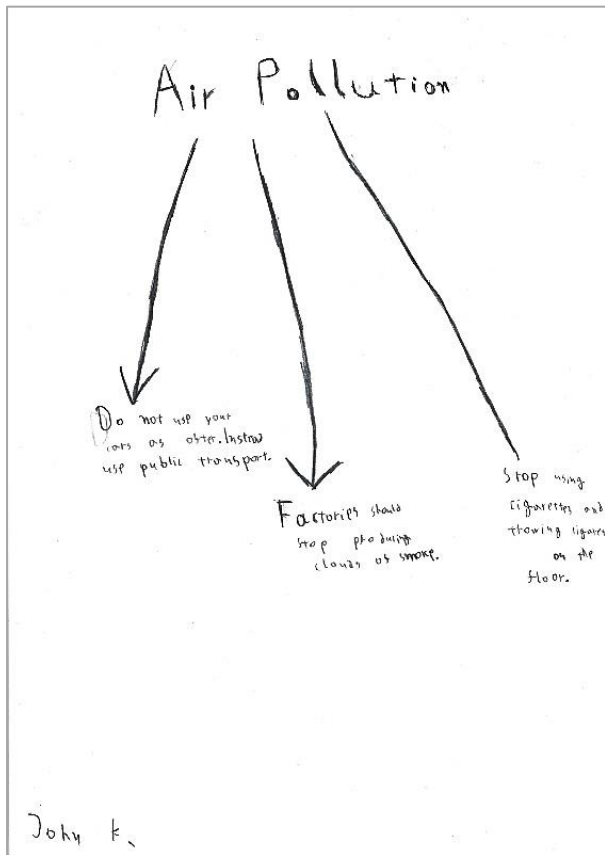

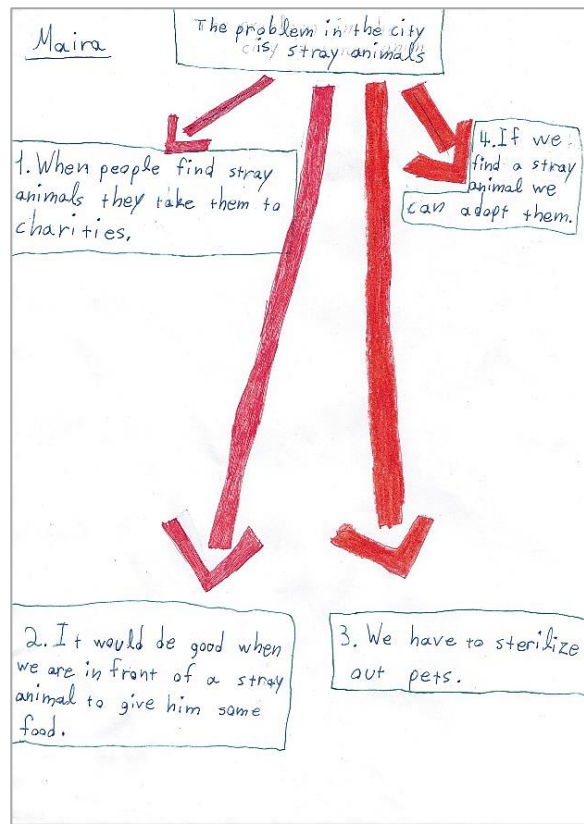

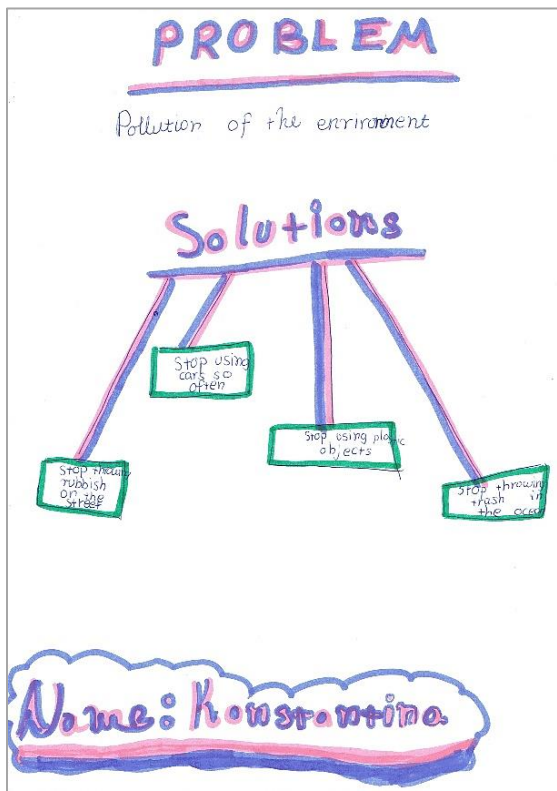

Larinda

We don't have many trees and flowers.

WE must plant a lot of trees and flowers.

We must plant a lot of trees and flowers like apple, berry, strawberry, pear trees and Rose flowers.

Aggelonida Pavlou E.

Traffic Education

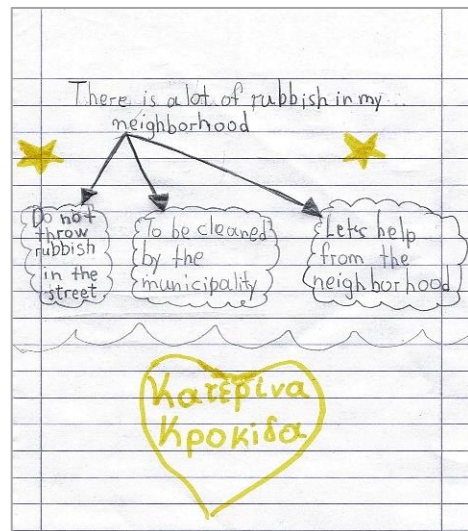

Our children are not just the next generation of drivers. With their responsible look, they make us better at all levels and often remind us of our obligation to drive responsibly and prudently on the streets. They urge us, in other words, to stay focused on what we ourselves teach them: "to respect speed limits", "to always say no to alcohol when driving", "to wear our seat belt even for short distances", "to use the pedestrian crossing" and so much more. For this reason, the fact that today the request to introduce as compulsory the teaching of Traffic Education in schools from primary school, is becoming an act of double value.

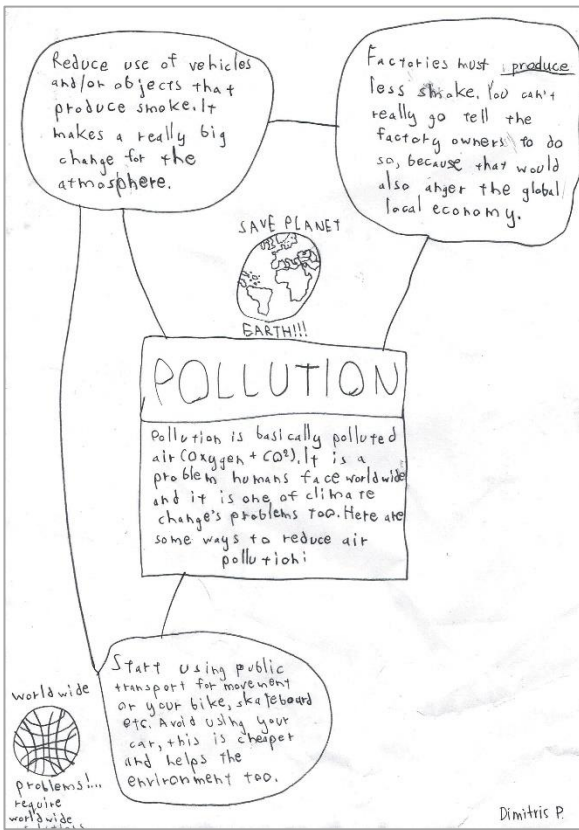

"I drive and walk safely", at the Children's Museum of Athens

What is Traffic Education?

Traffic Education, a necessary pillar of Road Safety, is the formation of traffic awareness in order to act responsibly as drivers, as pedestrians, as passengers, as cyclists. And of course, education is considered an essential part of the integrated approach to Road Safety, as highlighted in a Report by the European Transport Safety Council (ETSC).

On the ground floor of the Children's Museum of Athens, children and parents will find the new exhibit "I drive and walk safely" that promotes Traffic Education. An interactive environment with roads, sidewalks, crossings, traffic lights, traffic signs etc., through which children experience learning and exercise, while it helps them adopt safe ways of road traffic as pedestrians, cyclists, passengers or drivers. The exhibit is addressed to children aged 3 to 12 years and was designed by an interdisciplinary working group with the participation of educators and museologists from the Hellenic Children's Museum as well as transport specialists from the companies "Attiki Odos SA" and "Attikes Diakromes SA" and was implemented after a six-month study.

VIOLENCE IN STADIUMS

Violence in stadiums it's a big problem, as we saw recently. This problem must be solved. Here's how: The stadiums are for playing football, basketball e.t.c.. To support a team, but not to beat someone who isn't the team you are. Stop violence to innocent people!!! Andrew

under extinction in Greece

In this project I'll talk about the animals that are under extinction in Greece and live in the sea. Some of them are: the Mediterranean seal *Monachus monachus*, the turtles *Kaveta-Kaveta*, the hammerhead whaler and the dolphins.

The threats that these animals face are:

- Destroying of beaches and ecosystems
- Hitting by boats
- Plastic pollution at sea
- Light pollution & noise pollution
- climate change
- Traffing in fishing gear

There are organisations such as WWF that do a lot to protect these animals. It's very important that the public is informed about these matters. And we have to support WWF!

Yes

OK

One of the most important problems in our city is when the cars park on the pedestrian crossing or on the pavements.

Whenever I go for a walk with my mum or my friends, I always see cars that do this and I get really angry. These drivers do not respect at all not only all people, but also people at wheelchairs or mums with their babies, I'm sure you agree that this is totally unfair.

The police must be more careful about it and they must charge these drivers with a fine. It is also a good idea to have more advertisements on TV about these matters in order for all people to be more sensitive.

1) Crossing the street without looking could kill you. If you do that you may end up in a hospital or not survive. I think that people that don't look left and right should not do that again, even if you are fast a car could run twice as fast or even more times that you. Some cars stop when they see people crossing the street but you don't know if they will. So be careful!!!

2)

3) If you ride a bike along a busy street or avenue, you should stop doing that because riding a bike in a busy place could get you killed! How? A bike isn't as strong and heavy as a car/bus/etc. If a car doesn't see you, you may crash with them. You should ride a bike in a bike lane instead, or go to a park.

Traffic problems in city

Οροδωγα
Μαργαρίτη
Ε.Ε.

A lot of people go to work or to school by car. A lot of cars are on the road and this is a traffic problem.

I don't think that driving to work or to school is a good idea. It seems to me that walking to school is a very good habit. In my opinion using public transport is convenient and Good for all!

ANIMALS UNDER EXTINCTION

Habitats should be protected from agriculture and settlement expansion.

In order for these animals to live we must keep the seas clean, do not throw garbage in seas and shores.

Who kills them to go to jail?

Red Deer

monk-monk seal

Carreta carreta turtle

Humpback whale

Elpida Nikolov

Nektaria

FOREST FIRES

In the summer we got a lot of forest fires if we want to solve this we could try doing these things:

- We could maybe try stop using so much gas cause then we ruin the planet and the sun is more powerful and can create fires!
 - Fireworks are also dangerous its fun to set off but the are like bombs to the planet.
 - Cigarettes, if we smoke it's bad for us and the nature if we don't place the cigarette in a fire-proof container it can create fires!
 - Camp sites are dangerous also well not quite but it's bad for nature if we don't pull out the fire with water!
- That's all!

Εργασία E2

We must not pollute the environment with exhaust fumes. For this we have to get electric cars. Electric cars do not pollute the environment with blue gas.

Sotiris

Theodosia Tsanou E'2

Environment

Let's recycle all our rubbish!

It seems to me that we should use less water and electricity.

How about we put some small rubbish bins at beaches?

I think that if everyone recycles, we will have a healthier, more beautiful and cleaner environment.

Good environment

Bad environment

Issue: riding your bike along busy streets or avenues.

A lot of people go to their work by bicycle. There are many dangers when somebody riding his bicycle in the middle of the street. A car can hit him. Your bicycle can break down. You can fall off your bike. To avoid all this we can make special bicycle lanes.

HOW TO GET RID OF COVID-19

- Wash your hands

- Keep distance at least 2m

- Wear your mask properly

- use antiseptic

- Vaccinate yourself

Forest Fires

In April 2020, the number of fires alerts across the globe were up by 13% compared to last year - which was already a record year for fires. Climate change and wild fires mutually reinforce each other, and the fires burning today in many parts of the world. Remember when I went on holidays to Samothrace there was so many burnt trees around me from fire that had broken out in the past, everything around me was black, I'm so sorry for the animals that lived there. ☹️☹️

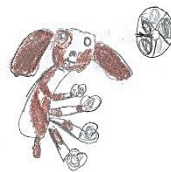

No Forest Fires

Dimitra

Homeless dogs

In my opinion
 we must take the homeless dogs of home and buy new at the pet shop.
 give them food which we have.
 take them home.
 give them to vets or animal organisations.
 bring them to ensure their safety.

Mix 143

Sylvia The stray Animals!!

Stray animals in a country are a problem and they are sad because they did not have a good time either. Some fluffy, bad-tempered animals usually kittens and babies do not watch the road and get injured. People sometimes do not feel sorry for them and beat them even if they are stray but also if they are pets.

Solution

We all have to take care of them and spend them as a pet, but if someone does not want to, it is not prudent to make fun of them and hit them.

RECYCLE ΤΕΣΤΙΑ ΜΗΝΙΑ

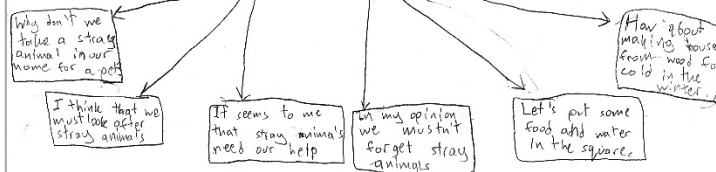

People can help the environment with the recycle!

1. I think people have to do recycle.
2. It seems to me that we must throw our rubbish only in bins.
3. In my opinion we have to throw the batteries in special bins.
4. Why don't people stop to throw plastic and rubbish in the sea?
5. Let's try to help environment with the recycle!
6. How about cleaning the streets?

WE NEED YOUR HELP

PROBLEM STRAY ANIMALS

Jimmy Papodas

I think that a problem in towns is the atmosphere pollution from many cars and factories.

There aren't many parks with trees and the life is very boring without green and fresh air.

Some solutions:

Why don't we use public transport?

How about walking to school rather than driving to school?

It seems to me that creating more parks in towns is very significant.
In my opinion, growing trees in schools is the best idea!

Thanos Hadjikeridis

Isabella Papadimitrou 62 Class.

In my opinion we must go to work with bus.

I think that riding our bike along a busy street, it is a great idea.

All Children must help the elderly people with the shopping.

It is not safe for children crossing the street without looking.

It seems to me that taking care of the trees in front of our house is a great idea.

Environmental Pollution

In my opinion environmental pollution is an important issue

I think we can all help. It is important that we don't throw rubbish in its streets and seas. Let's try to make our earth better.

Recycling means...

Reducing waste...

... Reusing materials

... Respecting Nature

SO... RECYCLE NOW!

3. Ανακύκλωση υλικών.

Recycling is the processing of used materials into new products that we can use again. If we recycle, we reduce waste and pollution and we save energy.

Many kinds of materials can be recycled: paper, glass, metal, plastic etc

Recyclable materials are collected in large bins and then taken to special factories where they are sorted out and turned into new products.

This is an easy and cheap way to protect our environment

Ambience
to refer is bosky and bush, advise again
make it's the ambience

Ο φίλος μας το περιβάλλον

The pollution of the environment!

more dumpsters on the streets and at the beaches!

do not throw rubbish down the street!

do not use the car without reason!

PROBLEMS

STRAY ANIMALS *Analysis*

It seems to me that we have to look after stray animals.

I think that we mustn't kill stray animals.

In my opinion stray animals need our help.

Let's put some food in the street for stray animals.

How about making houses for stray animals?

Why don't we take a stray animal for a pet?

George Polomarkacki

Infection: it is the most common enemy. Contamination includes air, water and soil. Industry and cars are the main culprits. Heavy metals, plastics and nitrate waste have their share of responsibility. While not to be overlooked is the evil they do to dump oil into the seas as well as the acid rain and urban runoff. As for soil pollution the big risk comes from factory waste.

ENVIRONMENTAL POLLUTION
