

# The environmental pollution

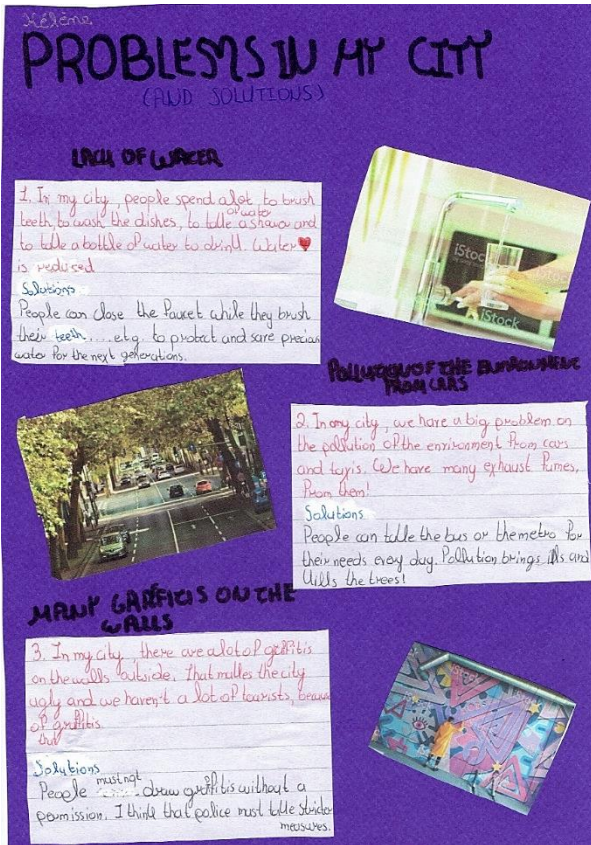

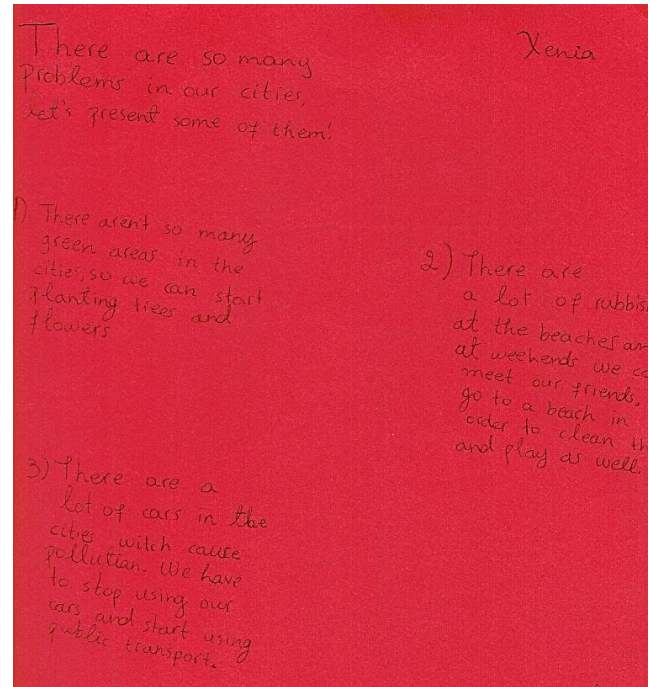

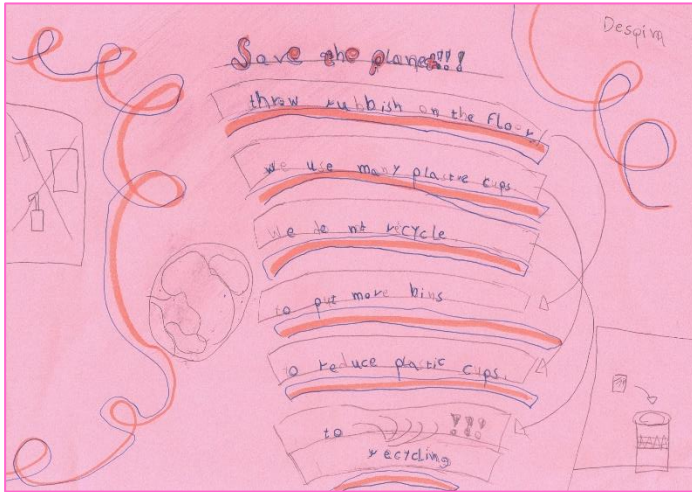

Η Ε΄ τάξη στο πλαίσιο του μαθήματος των αγγλικών δημιούργησε αφίσες με θέμα τη ρύπανση του περιβάλλοντος.

Οι άνθρωποι είμαστε όλοι λίγο πολύ υπεύθυνοι για τη δημιουργία της. Η ρύπανση προέρχεται ακόμη και από το σπίτι μας. Τα σκουπίδια ξεχειλίζουν από τους κάδους ενώ οι άνθρωποι δεν υιοθετούν την ανακύκλωση. Είναι δύσκολο να σταματήσουμε τις ανθρώπινες δραστηριότητες που ρυπαίνουν το περιβάλλον, αλλά αυτό πρέπει να γίνει πριν προκαλέσουν ανεπανόρθωτες καταστροφές.

Στόχος των μαθητών ήταν να εμπλουτίσουν το λεξιλόγιο τους και να μάθουν να συλλέγουν πληροφορίες και να τις κατηγοριοποιούν. Τις αφίσες τις κρεμάσαμε στην τάξη για να προβληματίσουμε τους συμμαθητές μας.

# Εργασία Ε1

	Ziws 29/3/2022
	Piraeus is a big city but it has many problems. One of them is the traffic. Many cars will stuck for hours at the center of Piraeus. This happens because we have rally trams and buses but many drivers will park their cars in double line. Also other disadvantage of Piraeus is that there aren't many parks for kids to play. I love play football and I want more parks for me and my friends.

# { PROBLEMS }

Pollution

One problem is that there aren't many bins for recycling and people are forced to throw their rubbish in the green bins for the common garbage.

Transportation problems

One problem is that many motorbikes park on the sidewalks and they prevent citizens and wheel chairs from passing.

protect the Environment

Solutions:  
We can ask the municipality to place more blue bins.

Solutions:  
We can organize demonstration and make the drivers think about the problems they have made.

Name: Fay

# POLLUTION

The pollution of environment is a big problem.

We can use a bicycle or our feet.

## SEA POLLUTION

The sea pollution is a big problem.

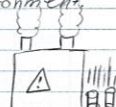

We can't drop rubbish in the sea

Andrew

2 important problems Jason L.

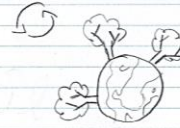

1st) POLLUTION

Every day people pollute the atmosphere! The people say "I don't mind" but this is very important to our environment! We need to protect the earth!

2nd) TRAFFIC

The traffic is one problem that we can disappear! However we can use bikes and we can walk. Use public transport is a better idea!

Save our planet!

## KAPHE

1. Preventing measures at international level to deal with regional and worldwide
2. Providing solutions to environmental problems which are widespread in the region and the relevant sector.

## Nehtaria ★

«Ways to save our planet»

### Sea Pollution

- We can clean the rubbish out of the sea

### Recycle

- Don't use plastic bottles, spoons, forks, cups
- Throw away plastic items in the blue trash can
- Don't throw plastic items at the beach.

### Our Planet

**RECYCLE**

People usually throw plastic bags and other rubbish in the sea.

We can stop throwing rubbish in the sea.

The cars pollute the environment.

We can use public transport.

The people throw rubbish in green bins.

We can throw the rubbish in different bins to recycle.

environment

Save the Planet!  
**Protecting the Planet!**  
**ENVIRONMENT**

**Problem**

**e-waste (electronic)**

**Solutions**

1. Throw your devices in different/specific cans
2. When your e-waste affects the environment, the oxygen has chemicals! so, recycle your e-waste
3. When you get a new phone, give the old one to a person that needs it! e.x homeless people

Konstantina R.

**Problems** →

There are a lot of problems that we need to fix. Here's some of them:

1. **Climate change!** In the past, natural factors, such as volcanic eruptions and El Niño, caused fluctuation in the temperature and rain fall.
2. **Pollution of the air, water and soil** caused by toxins such as heavy metal etc.
3. **Waste disposal:** An excessive amount of waste is produced and dumped in the oceans. Nuclear waste is particularly dangerous, as well as plastic and electronic waste.

**SOLUTIONS**

1. **Deforestation can help us, do this!** Decent studies show that nature-based solutions can contribute up to 37% of the carbon emission intake required to keep global warming below 2 degrees celsius.
2. **We can use less cars and factories can try to produce smother!**
3. **We can try to recycle correctly** because some people put wrong items in bins. We can also contact our local community to help with waste disposal.

Our city's problem

Our city is Piraeus. Piraeus is a busy city with a lot of problems. Three problems are bigger than others:

- a) There are a lot of cars in the Piraeus road. This is a huge traffic problem. All people here are unhappy with that.
- b) There aren't any bins and every summer all the bins in the city are full. And then the city smells very bad.
- c) In Piraeus there are a lot of animals (cats or dogs) in the street. Every year some of these animals die, because they haven't food and clean water. This is very sad and bad.

We can solve some problems by doing the following:

- a) Going to work and to school on foot or with a bike instead of driving the way, to solve the traffic problem.
- b) Recycle and re-use things: help to have few rubbish.

We should make a poster about sea pollution. Summer is near. The beaches every summer are full of rubbish. The poster should show people like us cleaning the beach. Also birds flying over the rubbish like seagulls. It would be nice to call them to help us.

Sea pollution - come to help!

 Ε2

Monday: We are turning off the lights when we don't need them.

Tuesday: We are re-using plastic bags for shopping.

Wednesday: We are not leaving the taps running while we are doing things.

Thursday: We are walking to our jobs, to our school, to the supermarket.

Friday: We are watching environmental documentaries on T.V.

Saturday: We are recycling paper, glass etc.

Sunday: We are discussing the environment problems and we are finding solutions.

Save the planet and stay safe!!!

Project title: AIR POLLUTION

Monday: We are discussing the problem and possible solutions

Tuesday: We are collecting material (photographs, newspapers, articles) to hold an exhibition at school.

Wednesday: We are drawing a poster with the slogan "Drive less, Walk more, SAVE ENERGY, SAVE MONEY, SAVE THE EARTH."

Thursday: We are making leaflets to persuade people to go to work / school on foot / by bike / by bus.

Friday: We are handing out leaflets

Saturday: We are preparing the material for the exhibition

Sunday: We are presenting the subject and talking about the solutions

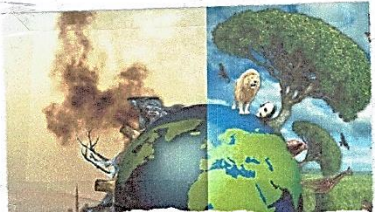

Paragota Papadimitriou

Title: **Environmental PROBLEMS**

**1**  
 throw our garbage in the bins and not in the streets, also it would be good to recycle.

**2**  
 Use the bicycle instead of the car or the motorbike when we travel.

**NOT THROW RUBBISH IN THE SEAS.**

**OUR FRIEND, THE ENVIRONMENT**

The environment needs our help! Some people don't mind about it and pollute the environment. Here are some problems about the environment and what we can do to stop them.

**1. The sea is dirty!**

Some people throw rubbish in the sea. Some sea animals think that rubbish is food, so they eat rubbish.

What we can do?

- We can collect the rubbish from the beach and throw them to a bin.
- We can try to persuade people that they mustn't throw rubbish to the beaches.

**2. The forest fires!**

Some people burn the forests. The oxygen belittles and the fire pollutes the fresh air.

What we can do?

- We can try to persuade people to protect the forests.
- We can take part with our school in planting expeditions.

 Problems

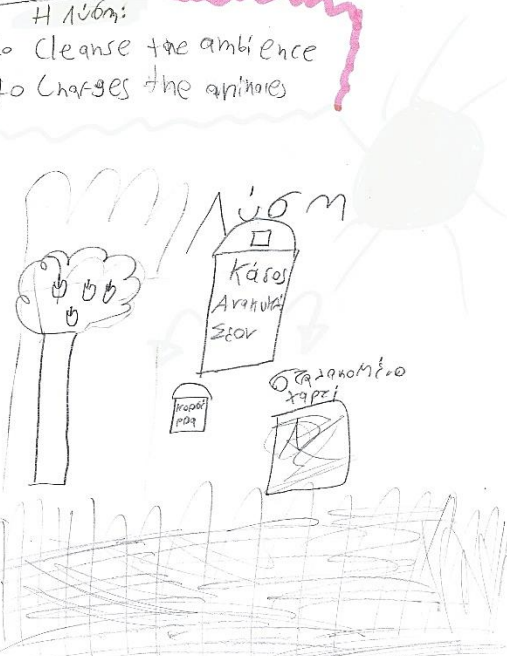

Two of the biggest problems of our cities are: the bad habit of not recycling and there are no parking spaces.

- Our Municipality should place recycling bins everywhere so that citizens can recycle more things. We as citizens should be responsible and more careful.
- The state must take care to make public parking for citizens, as it is in other European countries. In order for our city to become better, we must all take of and contribute to it.

PROBLEMS

# Environmental problems

Dimitra

Some people throw their garbage in the sea, but I have a solution to throw them in bins so the sea will not be polluted and the fish will not get sick.

some people do not put their rubbish in the correct bin. I have a solution to put stickers on to the bins.

get recyclable packaging because you can reuse it without polluting the environment.

Jimmys Papoulas

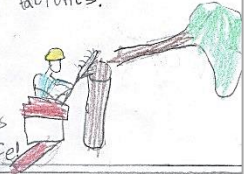

People often throw rubbish on the beach.

I think that people must throw their rubbish in the bins.

People cut down all the trees from the forests and then build many buildings, roads and factories.

In my opinion, we must plant many trees because trees help people live a better life.

People sometimes put campfires when they have a picnic.

It seems to me that we mustn't put campfires in the forests and we must bring food from our houses.

<ul style="list-style-type: none"> <li>We can recycle paper, garments, old toys, plastic metals.</li> <li>We can buy as much food as we consume.</li> <li>Do not leave the water running when we brush our teeth.</li> </ul>
Christos

## Actions for a better

### Environment

- I think that if we all recycle and don't leave garbage on the streets, the environment we live in, will be much cleaner!
- Let's make our trips by bus or on foot.
- When we brushing our teeth, don't leave the sink faucet open.

WE CAN ALL  
fight for a better

# ENVIRONMENT!

Theodora

Project title: "All together we can protect the environment!"

Monday: We are preparing an exhibition of photographs on the problem.

Tuesday: We are preparing a small video with the environmental problems from the area around our school.

Wednesday: We are collecting articles, posters, pictures and other material relevant to the problem of excess rubbish and recycling.

Thursday: We are using material that can be recycled to make new objects and presenting them.

Friday: We are organising an exhibition with all the material collected and we are presenting them.

Saturday: We are producing posters and leaflets to inform people in our area.

Sunday: We are preparing a school newspaper to inform all the pupils and their parents for our activities about the environmental problems in our area.

Thanos Hadjikeridis

## Ways to deal with environmental POLLUTION!

### 1) problems

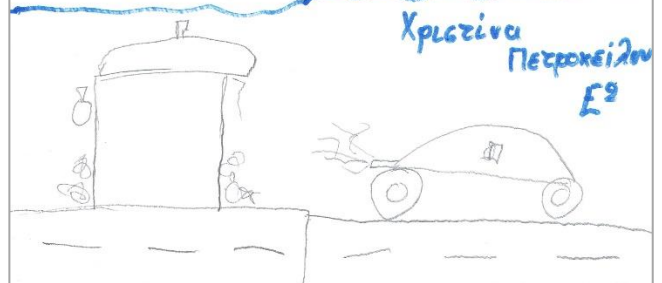

One bad thing is that a lot of people use their cars.

### 2) solution

One way to find out is to use more of signature e.g. bikes

one bad thing is that many young and old people throw garbage in the street.

One solution is to put extra bins on the streets and sidewalks

## 2 Problems about the environment

1. The cars make pollution to the environment.

Suggestion: We can use public transport, bikes or going on foot to near places.

2. Many people throw rubbish on the beach.

Suggestion: We can put bins in many places in the beach and if we see someone throw rubbish in the beach, we can tell him or her to stop do this.

Anastasis Billis
