

[More Views on Social Media..](#)

---

‘The advantages of social media are that you can communicate with other people and keep in touch with them..Also ,you can entertain yourself with games and learn things.Social media are useful and make people’s lives easier.

On the other hand,sometimes social media may be dangerous and annoying.A lot of people have bad experiences because of cyberbullying .Cyberbullying can have different forms, like fake profiles, threatening messages,etc.Another disadvantage is that social media misinform people and brainwash them.

Finally,people have to be careful and not believe everything they read.We have to try to control it and not let these people make us believe what they want..’

'Social media is a good way to stay informed about all the things that are happening on Earth ,but social media also hide many dangers in them.

For example,if you are not well informed or smart,it is really easy for the cyberbullies to scare you.Another danger is that many hackers will try to control your PC and bully you by uploading photos and making you feel bad.My opinion is that cyberbullying can be stopped and ignored if someone is mature enough to do this.'

by Byron Tsigkris,Class A ,Senior High School

'Recently ,there has been a great deal of controversy about social media.Some people think that they are a good way to communicate and stay informed about the news and the lives of friends and famous people.Others claim that the use of social media is the main reason that communication these days is not as it used to be and is at its worst.

To begin with,social media is a new way to get informed faster.Also ,you can communicate with your friends right away or send pictures and

videos. In addition, you can share with them your opinions and things you enjoy. Social media is a nice way to entertain yourself and others.

On the other hand, social media have made people distant and isolated in front of a screen. People can easily get addicted to it and prefer staying at home connected on the Internet than going out and socialising with their friends.

In my opinion, the disadvantages outweigh the advantages. Social media can make one unsociable and can damage one's psychology. Communication, nowadays, has lost its 'power' and people ignore each other by spending all of their time in front of a screen..'

by Katerina Sotirhou, Class A, Senior High School

I am writing this essay to express my opinion about Social media .More specifically ,in the following paragraphs , I am going to mention the advantages and disadvantages of them.

First of all, the most important advantage of social media is that one can be informed about the global news.Also ,someone can communiacte with friends or relatives.Moreover,a lot of users play many kinds of games.Furthermore, you can post whatever you want ,so you can inform your friends about something or it can just be a photo of you ,included in a photo album that you can create.

On the other hand, there are some disadvantages that have to be mentioned. The first and huge one is that anyone can be a cyberbullying victim at any place anytime. Second, using the media a lot, most of the times turns into an addiction. And last, you can't have 100% of safety.

To sum up, I must say that social media are good for people but only if you know how to use them with safety and keep your personal information only for friends and people you know..'

'... One of the advantages of social media is that you can contact people that are far away from you for free, without having to pay anything..It's a good way to learn the daily ,weekly ,monthly news and keep yourself updated.

But ,unfortunately , there is a higher number of drawbacks that can cause serious trouble in someone's life.

The main one is cyberbullying. Some people are 'lurking' on the internet ,looking for someone who is innocent enough to embarrass.

Another disadvantage is the advertisements. These little things can fool you easily by showing stuff that might seem interesting to you but if you click on them ,you end up with a virus on your PC/phone ,that can damage your device.

Addiction, can destroy the brain and the eyes, too..

In conclusion, I would say that we must be very careful of where we log in, because with a blink of an eye ,our life might be ruined..'
