

INTERVIEWING MRS ZAXARIADOU AND MRS LIASKOU IN ORDER TO DESCRIBE TO US THE EXPERIENCES OF THEIR EDUCATIONAL TRIP TO GERMANY

BY PANAGIOTIS ALEVIZOS

STARTING WITH MRS ZAXARIADOU

First of all how was your trip?

-It was a wonderful and remarkable experience, with successful collaboration and fine weather!

Did you face any difficulties during your trip?

-To be honest, we didn't face any trouble and surprisingly the weather was delightful and made the whole visit much more pleasant than we had expected. Furthermore, I would like to mention our unforgettable visit to Heidelberg, where we had a walk at the city's center and we enjoyed the view of the impressive traditional buildings. In addition, we had arranged a meeting with a Greek woman, whose studies were associated with German architecture. It was definitely a nice part of our trip.

Which city of the ones you visited would you like to refer to as the most impressive?

-Personally, I had already visited most of the places we went to apart from Strasbourg, which was my favorite place. Although it seems to be similar to German cities because of the proximity to them, you could easily notice that you are in a different country and except for some similarities in the buildings, you could spot lots of differences in the citizen's behavior and their language. I would also like to single out the area called "Little France" in Strasbourg, where there is the Nekar river and you can see houses surrounding the river.

Which was the most interesting part of your trip you would like to share with us?

-For me it is difficult to select between all those amazing experiences we've had. I think that a part of the trip that is worth pointing out is when we visited the Greek school of Stuttgart. We all saw a different part of the country and it was really useful for us to see a Greek school in a foreign country. You could easily notice the nostalgia of the students for Greece. They really wanted to make a visit here and they also discussed some of the difficulties they are facing concerning their future job in Germany and some educational peculiarities. For example, if they were doing their studies in a foreign country and then they moved to Germany they would be forced to do extra school years due to the educational system there. That's the reason why we saw students who were adults! And their ages were like 19 and 20 years old.
